DETAILED ACTION

Election/Restrictions

Claims 3-5 and 23 are drawn to patentably distinct species generic to allowable claims 1 and 19. The species restriction is withdrawn, and claims 3-5 and 23 are allowed

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karen Lenker on May 26, 2004.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figures 6A, 6B, 7A, and 7B as submitted October 3, 2003 are cancelled because they contain new matter. Figures 6A, 6B, 7A, 7B, as attached to this action, will replace the cancelled figures, and these figures were mutually agreed upon prior to entry into the application.

Allowable Subject Matter

Claims 1-6, 8-13, and 19-24 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the applicant's surgical punch does not generate a shearing motion between the anvil and the cutter. This limitation was brought into each

Art Unit: 3731

independent claim by amendment. The prior art does not teach the use of an anvil and cutter wherein the cutter does not pass through the proximal plane of the anvil when the punch is actuated.

Response to Arguments

The rejection under U.S.C. 112 1st paragraph are withdrawn because while the applicant has not disclosed in detail how to make his invention, particularly with regard to a jack-screw actuator, it is reasoned that one of ordinary skill in the art would be able to construct the device using this actuation means, since the means is well-known. Thus the enablement requirement is met, and the rejection is withdrawn.

The drawing rejections are moot in view of the new drawings entered with this action.
